DETAILED ACTION

Allowable Subject Matter

The indicated allowability of claims 18-20 is withdrawn in view of the newly discovered reference(s) to Lin. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 18-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lin, US 2005/0003150 in view of Turner.

1. Lin teaches a packaging bag for storing and preparing food. The method limitations are inherent by the teaching of Lin. Lin teaches storing/placing leftover food within the bag. The leftovers correspond to the claimed dividing the bulk food supply into individual food portions. The bag 600 corresponds to the proportioning bags constructed with at least one vent and of a material that will withstand freezing and heating. See paragraph 0052.

2. Lin does not teach a bag with indicia corresponding to the days of the week.
3. Turner teaches a bag with color-coded indicia to indicate the date of week. It would have been obvious to one having ordinary skill in the art to construct the bag taught by Lin with color codes as taught by Turner to provide a means to indicate a particular day of the week the food was prepared.

Allowable Subject Matter

4. Claims 11-12 and 14-15 are allowed.

Response to Arguments

5. Applicant's arguments with respect to claims 11-12 and 14-15 have been considered but are moot in view of the new ground(s) of rejection.
